MOOC'S

Python for Data Science and Machine
Learning (Udemy)
Machine Learning (Coursera)

INTERESTS

Web Development
Machine Learning
Mobile Photography

STRENGTHS

• Team Player • Quick Learner
• Listening • Curious

PROJECTS

PUZZLEPEDIA | http://puzzlepedia.esy.es
Webapp for Puzzle Lovers to try out new puzzles. At present it has 140+ users and
800+ submissions
Technologies Used:
•HTML • CSS • Bootstrap • MySQL • JavaScript • jQuery • Amcharts

SMART GAS LEAK DETECTOR
IoT based cost effective system which detects LPG/CNG leakage and notifies remote
user about leakage. Also alarm is produced and the location is shown on google maps.
Technologies Used:
•Arduino IDE • Arduino Programming • Google maps API • Arduino Uno • GSM
SIM900A

CLASSIFYME | http://classifyme.pythonanywhere.com
News Article Classifier using Naive Bayes Algorithm which classifies given news
article to its category i.e. Politics, Business, Entertainment, Sports, Technology. For
training purpose used data from BBC news. Got 95% accuracy on testing data.
Technologies Used:
•Scikit-learn • ipynb • Pandas • Flask • Materialize

EDU-OLX | http://eduolx.890m.com
Educational OLX - An online platform for college students wherein they can sell and
buy old educational material.
Technologies Used:
•HTML • CSS • Bootstrap • PHP • JavaScript • MySQL

EXPERIENCE
